STANDARDS DRIVE ELECTROTECHNICAL SAFETY & INNOVATION

Electrical safety is one of the core activities of the Standards and Standards that help protect human lives which take into account the integrity of installations and systems. Governments want to protect their populations from unnecessary risks. Buyers want proof about a product or system's safety, performance and reliability. Users of equipment and consumers want to be able to trust the products or services they are purchasing. International Standards are the basis for conformity assessment and reduce the influx of low-quality products. They make products safer, which in turn increases consumer confidence and public safety.

ASEAN ELECTROTECHNICAL VIRTUAL SYMPOSIUM & EXHIBITION OFFERS KNOWLEDGE SHARING ON

- ELECTRICAL INSTALLATION SAFETY STANDARDS
- ENERGY EFFICIENCY, RENEWABLE ENERGY AND SUSTAINABLE ENERGY
- ASEAN POWER INTEGRATION
- SAFETY GUIDELINE OF APPLICATION AND INSTALLATION FOR SPECIAL LOCATION
- SMART TECHNOLOGY AND FUTURE TECHNOLOGY TRENDS

The Virtual Symposium will feature keynotes and presentations that revolve around the topics related to the theme which is "Standards Drive Electrotechnical Safety & Innovation" as well as speaking on various sub-themes listed above. As a tradition, the ASEAN Electrotechnical Virtual Symposium will also pave the way to a Virtual Exhibition from various industry stakeholders which allows you to gain direct access to engineering technology, product & services, and business networking meeting with both local and ASEAN manufacturers, traders, construction and services.
